The Autonomous AI Growth Engine

100 Advanced AI Agent Prompts, Production Architectures & SOPs for B2B Tech Founders & Revenue Leaders

Edition: 2026 Enterprise Edition
Author: AI Growth Engineering Labs
License: Commercial & Personal Implementation License
Product Version: v2.4

Executive Summary & Quick-Start Guide

Traditional go-to-market (GTM) motions in B2B tech have hit a wall: customer acquisition costs (CAC) are up over 60%, outbound reply rates on generic templates have plummeted below 1.2%, and content saturation makes generic AI copy worthless.

The winning playbook is **autonomous agentic workflows**—specialized AI agents with structured multi-turn instructions, clear schema enforcement, few-shot reasoning, and direct integrations into your CRM, data enrichment pipelines, and distribution engines.

This guide provides **100 battle-tested, production-ready AI prompts**, **4 end-to-end Standard Operating Procedures (SOPs)**, and **architectural blueprints** designed to generate qualified pipeline, maximize retention, and scale organic reach on autopilot.

How to Deploy These Assets

1. **Model Selection:** Recommended for Anthropic Claude 3.5/3.7 Sonnet, OpenAI GPT-4o / o1 / o3, or Google Gemini 1.5/2.0 Pro.
2. **Variable Substitution:** Replace bracketed parameters like `{{COMPANY_NAME}}`, `{{ICP_TITLE}}`, `{{TARGET_INDUSTRY}}` before running.
3. **Structured Outputs:** When feeding results into automated pipelines (n8n, Make, Python scripts), prompt instructions enforce JSON output.

Table of Contents

- **Module 1: Autonomous Inbound & Search Authority (Prompts 1–20)**
- **Module 2: High-Converting B2B Outbound & ABM Engines (Prompts 21–40)**
- **Module 3: Product-Led Growth & Onboarding Automation (Prompts 41–60)**

- **Module 4: Social Media Authority & Multi-Channel Distribution (Prompts 61–80)**
- **Module 5: Retention, Churn Prevention & Account Expansion (Prompts 81–100)**
- **Standard Operating Procedures (SOP 1–4)**
- **Production Automation Architecture & Tooling Stack**

Module 1: Autonomous Inbound & Search Authority (Prompts 1–20)

Prompt 1: Search-Intent Keyword Topology & Cluster Architect

```
Role: Senior SEO & Technical Content Strategist
Objective: Create an exhaustive topic cluster map for {{TARGET_NICHE}} optimized for high buyer intent.

Instructions:
1. Identify 5 Pillar Topic Themes that directly precede a purchasing decision.
2. Under each Pillar, generate 4 Sub-topics (2 Informational, 1 Commercial Investigation, 1 Transactional).
3. Map primary keywords, estimated search difficulty, and searcher intent stage (Awareness, Consideration, Decision).
4. Define internal linking architecture connecting all 4 sub-articles back to the primary conversion page.

Expected Output Format:
Structured Markdown table with Columns: [Pillar, Sub-Topic Title, Search Intent, Target Keyword, Primary CTA].
```

Prompt 2: First-Principles B2B Thought Leadership Op-Ed

```
Role: Founding CEO / Elite Tech Essayist
Objective: Write an 1,800-word contrarian essay challenging
{{CONVENTIONAL_INDUSTRY_BELIEF}}.

Instructions:
1. Hook: Call out an accepted metric or practice in {{TARGET_INDUSTRY}} that actively
destroys value.
2. Root Cause Analysis: Break down the historical reason why this practice began and why
modern shifts make it obsolete.
3. First-Principles Framework: Introduce the {{NEW_PARADIGM_NAME}} with 3 clear operating
rules.
4. Tactical Implementation: Provide 2 real-world scenarios showing the before/after cost
and outcome.
5. Call to Action: Direct reader to audit their current process.

Expected Output Format:
Publication-ready Markdown with pull quotes, bold takeaways, and subheadings.
```

Prompt 3: Programmatic Landing Page Copy Matrix

```
Role: Head of Growth & Conversion Rate Optimization
Objective: Generate variable copy templates for {{NUMBER_OF_PAGES}} programmatic SEO
comparison pages.

Instructions:
1. Define variable tokens: {{CITY/REGION}}, {{INDUSTRY_VERTICAL}}, {{PRIMARY_COMPETITOR}},
{{PAIN_POINT}}.
2. Craft 3 dynamic H1 variations emphasizing speed and ROI.
3. Generate a 3-point feature comparison grid with dynamic pros/cons.
4. Write 2 customer social proof testimonials with plug-and-play placeholders.
5. Include sticky bottom banner CTA copy with urgency trigger.

Expected Output Format:
JSON Schema with keys: `h1_variants`, `value_props`, `comparison_table`, `testimonials`,
`cta_copy`.
```

Prompt 4: Competitive Battlecard & Comparison Page Generator

```
Role: Product Marketing Director (PMM)
Objective: Construct an objective, high-converting '{{YOUR_PRODUCT}} vs.
{{COMPETITOR_PRODUCT}}' comparison asset.

Instructions:
1. Analyze {{COMPETITOR_PRODUCT}}'s top 3 weaknesses from G2/Capterra reviews.
2. Frame feature differences around business outcomes (e.g. time saved, security, total
cost) rather than feature lists.
3. Write a 'When to Choose {{COMPETITOR}}' section to establish instant trust and unbiased
authority.
4. Write a 'Why High-Growth Teams Choose {{YOUR_PRODUCT}}' section.
5. Add interactive FAQ answering pricing, migration difficulty, and contract lock-in.

Expected Output Format:
Clean Markdown comparison matrix followed by conversion copy.
```

Prompt 5: High-Converting Whitepaper / Lead Magnet Outline

```
Role: Enterprise Content Architect
Objective: Structure a 12-page definitive industry benchmark report on {{CORE_TOPIC}}.

Instructions:
1. Executive Summary & State of {{TARGET_INDUSTRY}} in 2026.
2. Proprietary Data Framework: 5 core quantitative benchmarks.
3. The Cost of Inaction: Economic modeling of teams ignoring {{CORE_TOPIC}}.
4. Step-by-Step Architectural Roadmap for Q1-Q4.
5. Vendor Evaluation Checklist & Request for Proposal (RFP) template.

Expected Output Format:
Complete 12-section blueprint with word count targets and key takeaway bullet points.
```

Prompt 6: BOFU Product Alternative / Versus Page Generator

```
Role: Growth Copywriter
Objective: Generate a high-converting 'Top 5 Alternatives to {{LEGACY_SOFTWARE}} in 2026'
guide.

Instructions:
1. Identify the 3 critical pain points causing users to leave {{LEGACY_SOFTWARE}}.
2. Profile Alternative 1 (Your Product) with distinct positioning as the modern agentic
alternative.
3. Profile Alternatives 2-4 objectively highlighting niche use-cases.
4. Include a quick-decision matrix table.
5. Add a 14-day zero-risk migration offer CTA.

Expected Output Format:
Markdown article optimized for search engines with SEO title and meta description.
```

Prompt 7: Technical API / SDK Documentation Explainer

```
Role: Lead Developer Advocate
Objective: Transform complex API endpoints for {{PRODUCT_API}} into an intuitive,
developer-delighting guide.

Instructions:
1. Provide a 3-line quickstart code snippet in Python, TypeScript, and cURL.
2. Explain authentication, rate limits, and webhook event payloads with strict JSON
schemas.
3. Walk through the 'Happy Path' end-to-end tutorial with sample inputs and responses.
4. Document edge-case error codes (400, 401, 429, 500) and recovery strategies.

Expected Output Format:
Markdown documentation formatted with syntax-highlighted code blocks.
```

Prompt 8: Case Study & Customer Transformation Storyboard

```
Role: Customer Advocacy Lead
Objective: Turn customer raw interview transcripts for {{CLIENT_COMPANY}} into an
undeniable enterprise case study.

Instructions:
1. The Bottleneck: Quantified operational pain before deploying {{YOUR_PRODUCT}}.
2. The Evaluation: Why alternative solutions and in-house builds failed.
3. The Rollout: 14-day implementation timeline and change management.
4. The Quantified Payoff: 3 highlighted metrics (e.g. 4.2x Pipeline, 68% Cost Reduction).
5. Executive Quote: 2 punchy soundbites from the VP of Engineering.

Expected Output Format:
Standard Case Study format: Summary Box, Problem, Solution, Results, Key Quotes.
```

Prompt 9: Interactive Calculator / Assessment Lead Magnet Spec

```
Role: Product-Led Growth Engineer
Objective: Design the logic, copy, and result tiers for an interactive ROI Calculator for
{{TARGET_INDUSTRY}}.

Instructions:
1. Define 4 numeric user inputs (Team Size, Avg Deal Size, Current Cycle Length, Tools
Budget).
2. Write mathematical formulas for Annual Loss to Inefficiency and Potential Savings.
3. Create 3 personalized result outcome tiers (At Risk, Moderate, High Efficiency).
4. Write gated email capture modal copy promising the custom 6-page PDF report.

Expected Output Format:
Form schema, JavaScript calculation formulas, and UI copy.
```

Prompt 10: SaaS Feature Announcement & Release Note Engine

```
Role: VP of Product & Communications
Objective: Draft a multi-channel launch kit for the release of {{NEW_FEATURE_NAME}}.

Instructions:
1. Product Hunt / GitHub Release Changelog summary.
2. In-App Notification pop-up copy (under 45 words with action CTA).
3. Customer Success email to existing enterprise tiers.
4. Public LinkedIn post framing the technical why behind the build.

Expected Output Format:
Grouped Markdown blocks labeled by channel and audience segment.
```

Prompt 11: Topic Authority Gap & Content Decay Audit

```
Role: Principal SEO Strategist
Objective: Audit existing URLs for {{COMPANY_DOMAIN}} and identify authority decay against
competitors.

Instructions:
1. Cross-reference search rankings drops over the past 180 days.
2. Identify out-of-date statistics, missing schema markup, and broken intent matches.
3. Provide surgical update instructions for each lagging URL (e.g. new sections, refreshed
data, internal links).
4. Generate priority score (High, Medium, Low) based on pipeline potential.

Expected Output Format:
Audit report table with actionable remediation checklist.
```

Prompt 12: Schema-Enforced FAQ & Snippet Dominator

```
Role: Technical SEO Engineer
Objective: Generate 10 high-intent FAQs with valid JSON-LD structured data for
{{PRODUCT_PAGE_TOPIC}}.

Instructions:
1. Select questions directly reflecting People Also Ask (PAA) and search engine queries.
2. Write concise, definitive answers in 35-50 words optimized for AI search summaries.
3. Provide valid JSON-LD Schema snippet ready to drop into Next.js `<head>`.

Expected Output Format:
FAQ text block followed by validated `<script type='application/ld+json'>` code.
```

Prompt 13: Executive Ghostwriting LinkedIn / Newsletter Essay

```
Role: Ghostwriter to Fortune 500 Founders
Objective: Draft a personal, vulnerable yet authoritative leadership essay for
{{FOUNDER_NAME}} on {{PIVOTAL_MOMENT}}.

Instructions:
1. Hook: Start in media res with a high-stakes decision or costly failure.
2. The Uncomfortable Truth: Reveal an industry reality that most peers refuse to say
publicly.
3. The Paradigm Shift: Detail the exact moment perspective changed.
4. Actionable Lessons: 3 tactical rules for leaders navigating similar growth phases.
5. Closing question to drive executive comment discourse.

Expected Output Format:
900-word editorial essay formatted for Substack/LinkedIn Articles.
```

Prompt 14: Developer Community Q&A & Forum Authority Builder

```
Role: Technical Community Evangelist
Objective: Draft authoritative, non-promotional responses to common community questions
regarding {{TECH_PROBLEM}}.

Instructions:
1. Direct code solution resolving the developer's core friction immediately.
2. Explanation of underlying memory, latency, or concurrency implications.
3. Mention open-source libraries and best practices.
4. Subtle mention of {{YOUR_TOOL}} only if natively relevant to simplifying the solution.

Expected Output Format:
Markdown answer ready for StackOverflow, Reddit, or Discord dev forums.
```

Prompt 15: Industry Benchmark Report Synthesis Engine

```
Role: Chief Data Analyst
Objective: Synthesize raw survey responses from {{SAMPLE_SIZE}} enterprise leaders into 5
macro trends.

Instructions:
1. Trend identification with statistical confidence intervals.
2. Contrarian discrepancies between what executives say vs what their teams deploy.
3. Visual chart data tables ready for Figma/Infographic designers.
4. Executive pull quotes explaining each statistical anomaly.

Expected Output Format:
Analytical report with executive takeaways and data visualizations.
```

Prompt 16: B2B Video Teardown / Loom Script Architect

```
Role: Head of Product Marketing
Objective: Write a 90-second asynchronous Loom video script auditing a prospect's current
{{WORKFLOW_OR_PAGE}}.

Instructions:
1. Seconds 0-15: Immediate pattern interrupt and personalized compliment on recent work.
2. Seconds 15-45: Point out 2 hidden conversion bottlenecks on their screen.
3. Seconds 45-75: Show how 2 peer companies solved this and 3x'd throughput.
4. Seconds 75-90: Zero-pressure offer to send the full teardown framework.

Expected Output Format:
Two-column video script (Visual Cues | Spoken Dialogue).
```

Prompt 17: Interactive Infographic Data Storyboarding

```
Role: Visual Content Architect
Objective: Storyboard an infographic detailing 'The Evolution of {{INDUSTRY_CATEGORY}}:
2015 to 2026'.

Instructions:
1. 4 Era Breakdown (Manual → Cloud → Automation → Autonomous Agents).
2. Key bottlenecks, tooling stacks, and average cost per transaction per era.
3. Wireframe notes for visual designers (color palette, typography, icon references).
4. Accompanying social media caption summarizing the timeline.

Expected Output Format:
Structured storyboard specification with visual directions.
```

Prompt 18: High-Intent Webinar & Masterclass Deck Outline

```
Role: Strategic Event Producer
Objective: Build a 45-minute live masterclass deck teaching 'How to Automate
{{CRITICAL_BUSINESS_PROCESS}}'.

Instructions:
1. Slides 1-5: The Burning Platform (Why the old way is hemorrhaging budget).
2. Slides 6-18: The 3-Pillar Autonomous Framework with live architecture demonstrations.
3. Slides 19-32: Live teardown of a real enterprise workflow.
4. Slides 33-40: The Commercial Offer & Limited Launch Incentive.
5. Slides 41-45: Live Q&A prep for tough attendee objections.

Expected Output Format:
45-slide script outline with Slide Title, Visual Asset, Talking Points, and Audience
Engagement Triggers.
```

Prompt 19: Zero-Click Search Summary & Key Takeaway Generator

```
Role: AI Overview Optimization Specialist
Objective: Summarize comprehensive guide on {{TOPIC}} into an AI-overview optimized
definition block.

Instructions:
1. 2-sentence direct definition answering 'What is {{TOPIC}}?'.
2. Bulleted list of 4 essential operational components.
3. Primary formula or calculation rule.
4. Common misconception debunked in 1 sentence.

Expected Output Format:
HTML block wrapped in microdata tags `<div class='quick-definition'>`.
```

Prompt 20: Inbound Lead Qualification Email Triage Matrix

```
Role: RevOps Automation Lead
Objective: Classify inbound form submissions for {{PRODUCT_NAME}} into 3 automated
response tiers.

Instructions:
1. Tier 1 (Enterprise / High Intent): Instant Calendly link with VP of Solutions.
2. Tier 2 (Mid-Market / Self-Serve): Automated sandbox workspace invite with personalized
onboarding video.
3. Tier 3 (Unqualified / Educational): Free prompt pack download and newsletter invite.
4. Write email copy for each tier.

Expected Output Format:
Decision tree flowchart logic in Markdown + 3 complete email templates.
```

Module 2: High-Converting B2B Outbound & ABM Engines (Prompts 21–40)

Prompt 21: Signal-Based Hyper-Personalized Cold Email Generator

```
Role: Elite Outbound SDR & Pipeline Engineer
Objective: Generate an under-85-word cold outreach email based on recent company trigger
event {{TRIGGER_EVENT}}.

Instructions:
1. Observation: State the verified trigger event and immediate technical friction.
2. Insight: Explain how peer companies handled this bottleneck.
3. Soft Offer: Offer a 2-page benchmark PDF or loom teardown.
4. Constraints: Under 85 words, 5th-grade reading level, zero buzzwords.

Expected Output Format:
Plain text email draft with Subject Line (under 4 words).
```

Prompt 22: Account-Based Marketing (ABM) 1:1 Account Dossier

```
Role: Enterprise Account Executive & Strategist
Objective: Construct an exhaustive account dossier on target account
{{TARGET_ENTERPRISE}}.

Instructions:
1. Tech stack breakdown (CRM, Analytics, Infrastructure, Agentic Tools).
2. Key decision makers (CTO, VP Eng, VP Product) with recent public quotes or LinkedIn
posts.
3. 3 Strategic Business Initiatives from their latest 10-K / annual report.
4. Value Hypothesis: Exactly where {{YOUR_PRODUCT}} generates >$500k in net value.

Expected Output Format:
Comprehensive Markdown Dossier with executive summary.
```

Prompt 23: Multi-Touch 4-Step Omnichannel Sequence

```
Role: Sales Cadence Architect
Objective: Write a 14-day multi-channel cadence (Email, LinkedIn, Voice) for
{{TARGET_ICP}}.

Instructions:
1. Day 1: Email 1 (Observation + Value Teaser).
2. Day 3: LinkedIn Profile View + Thoughtful Comment on recent post.
3. Day 7: Email 2 (Case Study with quantified metric from peer company).
4. Day 10: LinkedIn Connection Request with personalized note.
5. Day 14: Email 3 (Breakup email with resource gift).

Expected Output Format:
Complete sequence table with Day, Channel, Asset, and Exact Copy.
```

Prompt 24: Re-engagement Sequence for 'Dark' Pipeline & Stalled Deals

```
Role: Senior Account Executive
Objective: Revive deals for accounts that went ghost after a demo 45+ days ago.

Instructions:
1. Rule: Never ask 'checking in' or 'touching base'.
2. Introduce new external industry trigger or benchmark relevant to their use case.
3. Announce major product upgrade that solves the specific hesitation raised during the
demo.
4. Low-friction exit: 'If priorities shifted, completely understand—should I close this
file for now?'

Expected Output Format:
3-touch email cadence with subject lines and fallback SMS/LinkedIn notes.
```

Prompt 25: Executive C-Suite Soft-Offer Email Framework

```
Role: Strategic Enterprise Advisor
Objective: Draft a high-altitude email to the CEO/CIO of {{TARGET_ACCOUNT}} regarding
{{CORE_INITIATIVE}}.

Instructions:
1. Focus strictly on board-level metrics: EBITDA, risk reduction, operational headcount
leverage.
2. Reference peer CEO benchmark.
3. Offer an executive peer roundtable invitation or private briefing rather than a product
demo.
4. Limit to 60 words.

Expected Output Format:
High-converting C-suite email copy with 2 subject line variations.
```

Prompt 26: Technographic Migration Opportunity Outreach

```
Role: Competitive Replacement Specialist
Objective: Target companies currently using {{LEGACY_COMPETITOR}} with a migration
incentive.

Instructions:
1. Highlight recent deprecation, price hike, or outage from {{LEGACY_COMPETITOR}}.
2. Detail the exact zero-downtime migration path.
3. Offer a migration credit matching remaining contract value.
4. Soft CTA to review the 3-step migration blueprint.

Expected Output Format:
Targeted cold email sequence tailored to technographic data.
```

Prompt 27: New Executive Hire Congratulatory Trigger Sequence

```
Role: Pipeline Generation Specialist
Objective: Engage newly appointed {{EXECUTIVE_TITLE}} within their first 90 days at
{{COMPANY_NAME}}.

Instructions:
1. Congratulate on new role without being sycophantic.
2. Acknowledge the common 'First 90 Days' mandate to audit tech stack and drive rapid
impact.
3. Provide the 'First 90 Days Quick-Wins Framework' tailored to their department.
4. Offer a confidential peer benchmark call.

Expected Output Format:
2-step warm outreach sequence.
```

Prompt 28: Hiring Freeze / Budget Optimization Value Pitch

```
Role: RevOps Financial Analyst
Objective: Position {{YOUR_PRODUCT}} as an efficiency force multiplier during a hiring
slowdown.

Instructions:
1. Quantify how {{PRODUCT}} allows existing team of 5 to output the volume of 15.
2. Detail cost comparison: $47k tool vs $350k fully loaded salaries.
3. Highlight immediate ROI break-even timeline (< 21 days).
4. Offer a CFO-ready business case calculation spreadsheet.

Expected Output Format:
Email and LinkedIn message focused on efficiency and cost savings.
```

Prompt 29: Competitor Dissatisfaction Outreach (G2 / Capterra Complaints)

```
Role: Growth Hacker & Outbound Specialist
Objective: Reach out to users leaving 2-star and 3-star reviews on {{COMPETITOR_NAME}}.

Instructions:
1. Acknowledge known platform limitations (e.g. sluggish UI, terrible support, hidden
fees) without naming the review directly.
2. Present how {{YOUR_PRODUCT}} re-engineered that exact workflow from scratch.
3. Offer a 30-day VIP onboarding guarantee with dedicated engineering channel.

Expected Output Format:
High-converting outbound template with customizable complaint tokens.
```

Prompt 30: Post-Webinar / Event Attendee Conversion Sequence

```
Role: Event Monetization Specialist
Objective: Convert attendees of {{WEBINAR_TOPIC}} into qualified pipeline within 48 hours.

Instructions:
1. Segment into: Highly Engaged (Stayed >30 mins), Partial, and No-Show.
2. Deliver personalized replay link + supplementary template download.
3. Highlight the #1 question asked during Q&A and provide extended answer.
4. Include invitation to apply the framework to their custom workspace.

Expected Output Format:
3 tailored follow-up emails based on attendee attendance behavior.
```

Prompt 31: Mutual Connection & Social Signal Referral Opener

```
Role: Relationship-Led Sales Strategist
Objective: Craft an authentic warm referral email referencing mutual connection
{{MUTUAL_NAME}}.

Instructions:
1. State connection context clearly in first sentence.
2. Share specific insight {{MUTUAL_NAME}} mentioned regarding their current priority.
3. Bridge to single high-value resource without aggressive sales pitch.
4. Permission-based closing sentence.

Expected Output Format:
Warm referral email template + LinkedIn note.
```

Prompt 32: Inbound Form Abandonment Recovery Campaign

```
Role: Lifecycle Marketing Specialist
Objective: Recover high-intent prospects who started the demo request or checkout form but abandoned.

Instructions:
1. Send within 25 minutes of drop-off.
2. Subject: 'Quick question about {{COMPANY_NAME}}'s setup'.
3. Inquire if they ran into technical trouble or needed specific security documentation.
4. Provide a direct 1-click scheduler link.

Expected Output Format:
2-email rapid recovery sequence.
```

Prompt 33: Cold LinkedIn Voice Note / Short Video Script

```
Role: Modern SDR Coach
Objective: Write a 30-second conversational voice note script for LinkedIn outreach to {{PROSPECT_NAME}}.

Instructions:
1. Casual, non-rehearsed tone.
2. Immediate specific reference to a post or podcast they participated in.
3. One-sentence insight on {{PROBLEM}}.
4. Casual sign-off asking if they want a 1-minute loom or PDF.

Expected Output Format:
Voice script with pacing, emphasis marks, and pause annotations.
```

Prompt 34: Multi-Threading Matrix: Reaching 3 Decision Makers Simultaneously

```
Role: Enterprise Account Strategist
Objective: Write coordinated, simultaneous emails to the CTO, CFO, and Head of Marketing at {{TARGET_COMPANY}}.

Instructions:
1. CTO Email: Focus on security, API throughput, architecture simplicity.
2. CFO Email: Focus on software consolidation, ROI, payback period.
3. Marketing Head Email: Focus on velocity, conversion rate, team autonomy.
4. Cross-reference internal alignment between departments.

Expected Output Format:
3 aligned email templates designed to be dispatched on the same morning.
```

Prompt 35: The 'Anti-Sales' Honest Assessment Email

```
Role: Challenger Sales Practitioner
Objective: Write a radically candid email evaluating if {{TARGET_COMPANY}} is actually a
fit for {{YOUR_PRODUCT}}.

Instructions:
1. List 3 scenarios where they should NOT buy your product.
2. List the 1 scenario where your product delivers exponential ROI.
3. Ask them directly which bucket they fall into.
4. Contrast with traditional aggressive sales tactics to earn instant respect.

Expected Output Format:
Provocative, high-reply-rate email draft.
```

Prompt 36: High-Converting Custom ROI Proposal Teardown

```
Role: Commercial Deal Architect
Objective: Structure a 1-page executive deal summary for the buying committee at
{{PROSPECT_COMPANY}}.

Instructions:
1. Problem Statement: Current quantifiable cost ($/mo).
2. Solution Architecture: 3-step deployment.
3. Financial Model: Year 1 Cost vs Year 1 Measurable Economic Benefit.
4. Implementation Roadmap with Go-Live milestone date.

Expected Output Format:
1-page executive investment summary document.
```

Prompt 37: Gatekeeper Navigation & Internal Champion Identifier

```
Role: Outbound Intelligence Agent
Objective: Identify and empower the internal user champion to pitch {{YOUR_PRODUCT}} to
leadership.

Instructions:
1. Message to end-user: 'How much time do you personally spend on {{TEDIOUS_TASK}} each
week?'
2. Provide them with an internal pre-written email template they can forward to their VP.
3. Arm them with 3 bulleted counter-arguments to common manager objections.
4. Offer to build them a custom pilot at zero cost.

Expected Output Format:
Internal champion enablement kit.
```

Prompt 38: Follow-up Email After Ghosted Discovery Call

```
Role: Deal Acceleration Specialist
Objective: Re-engage a prospect who missed their scheduled demo call.

Instructions:
1. Empathetic opening acknowledging executive scheduling chaos.
2. Reschedule with 3 specific times + direct rebooking link.
3. Include a 2-minute recorded video previewing what was prepared for their specific
domain.
4. No guilt-tripping language.

Expected Output Format:
Discovery no-show rebooking email sequence.
```

Prompt 39: End-of-Quarter Urgency & Contract Incentive Letter

```
Role: VP of Sales
Objective: Accelerate contract signing for in-flight evaluations before quarter-end.

Instructions:
1. Offer genuine value concession (e.g. waived implementation fee, extra seats, locked
multi-year pricing) tied to specific signing date.
2. Justify why the concession exists (quarterly capacity planning).
3. Keep contract terms simple with Redline assistance offer.
4. Clean executive letter format.

Expected Output Format:
Quarter-end closing incentive letter.
```

Prompt 40: Outbound Cold Calling Battlecard & Objection Handler

```
Role: Sales Enablement Director
Objective: Generate rapid-fire responses for SDRs encountering top 6 live telephone
objections.

Instructions:
1. Objection: 'We already use {{COMPETITOR}}.'
2. Objection: 'We have no budget right now.'
3. Objection: 'Send me an email.'
4. Objection: 'Not a priority this quarter.'
5. Objection: 'I'm not the right person.'
6. Provide pattern interrupt, bridge question, and meeting confirmation close for each.

Expected Output Format:
Tabular cold calling battlecard with verbatim phrases.
```

Module 3: Product-Led Growth & Onboarding Automation (Prompts 41–60)

Prompt 41: First 5-Minute Time-to-Value (TTV) User Onboarding Flow

```
Role: Product-Led Growth Specialist
Objective: Map the exact sequence to bring a newly registered user of {{PRODUCT_NAME}} to
their 'Aha!' moment in < 300 seconds.

Instructions:
1. Micro-Surveys: 2 questions on signup to personalize the onboarding path.
2. In-App Checklist: 3 progressive milestones with progress bar mechanics.
3. Empty State Strategies: What to show before they connect data so the app feels
populated.
4. Welcome Modal Copy: 2 sentences setting expectations and immediate action.

Expected Output Format:
Step-by-step UX onboarding flow specification with exact UI copy.
```

Prompt 42: Behavioral Trigger Email Architecture

```
Role: Lifecycle Marketing Engineer
Objective: Design 5 event-triggered emails based on user telemetry within days 1-14.

Instructions:
1. Trigger: User signed up but did not invite a teammate after 48h.
2. Trigger: User uploaded data but did not trigger their first export.
3. Trigger: User hit 80% of free tier threshold.
4. Trigger: User was inactive for 7 consecutive days after initial activation.
5. Write subject line, preview text, body, and button copy for each.

Expected Output Format:
Event schema table + 5 complete lifecycle emails.
```

Prompt 43: Interactive In-Product Tooltip & Tour Copy

```
Role: UX Microcopy Strategist
Objective: Write high-delight, zero-annoyance product tour tooltips for 4 critical
dashboard features.

Instructions:
1. Limit each tooltip to 25 words.
2. Explain benefit, not just feature button mechanics.
3. Include 'Got it' and 'Show me how' micro-actions.
4. Ensure dismiss state persists permanently across sessions.

Expected Output Format:
Tooltip matrix with Step number, Anchor element, Header, Body, and Button labels.
```

Prompt 44: Empty State UX Copy & Activation Acceleration

```
Role: Product Designer & Copywriter
Objective: Transform empty screens (No projects, No data, No reports) into high-conversion
activation hubs.

Instructions:
1. Illustrative hook acknowledging empty state with playful, encouraging tone.
2. 1-click demo data population button ('Load Sample Enterprise Workspace').
3. Primary creation CTA button with prominent contrast.
4. 2-minute video explainer thumbnail embed.

Expected Output Format:
Wireframe specification with copy for 3 primary empty-state views.
```

Prompt 45: In-App Milestone Celebration & Social Sharing Prompt

```
Role: Growth Gamification Architect
Objective: Design the celebration modal when a user accomplishes {{CORE_ACHIEVEMENT}}
(e.g. 100th automated task).

Instructions:
1. Confetti/Micro-animation design brief.
2. Quantified celebration metric: 'You just saved 42 hours this month'.
3. 1-Click pre-written LinkedIn/X share button bragging about their operational
efficiency.
4. Bonus unlocked (e.g. 500 bonus API credits) as a reward.

Expected Output Format:
Celebration modal UX copy and social share card metadata.
```

Prompt 46: Feature Adoption Nudge for Dormant Power Features

```
Role: Product Marketing Manager (Adoption)
Objective: Target active users who use basic features but ignore the highest-retention
power feature {{POWER_FEATURE}}.

Instructions:
1. In-app banner triggered after 10th login.
2. Copy: 'You're doing {{TASK}} manually. Did you know you can automate it in 1 click?'
3. 15-second embedded GIF showing the interaction.
4. Direct activation button.

Expected Output Format:
In-app slide-over copy and notification logic.
```

Prompt 47: Usage-Gated Paywall & Upgrade Modal Matrix

```
Role: Monetization & Pricing Strategist
Objective: Design the paywall modal triggered when a free user exceeds {{USAGE_LIMIT}}.

Instructions:
1. Positive reinforcement: 'You've reached the free tier limit because your team is
crushing it.'
2. Clear visual comparison: What unlocks on Pro / Enterprise tier.
3. Social proof snippet from a paid user in their exact industry.
4. Annual vs Monthly toggle with 20% discount badge.
5. Frictionless checkout button.

Expected Output Format:
Paywall modal copy and layout specification.
```

Prompt 48: Self-Serve to Sales-Assisted Lead Handoff Trigger

```
Role: Product-Led Sales (PLS) Engineer
Objective: Identify Product Qualified Leads (PQLs) inside free workspaces and trigger
automated outreach.

Instructions:
1. Scoring Criteria: >3 users from same corporate domain + >50 actions in 72 hours.
2. Automated Slack/CRM notification to Enterprise Account Executive.
3. Contextual in-app message from dedicated solutions engineer offering SSO, security
review, and team billing.

Expected Output Format:
PLS scoring algorithm rules + outreach message templates.
```

Prompt 49: User Friction / Drop-off Point Diagnostics Generator

```
Role: UX Analytics Specialist
Objective: Analyze user drop-off during {{COMPLEX_WORKFLOW_STEP}} and create remediation
plan.

Instructions:
1. Diagnostic questions to isolate whether drop-off is technical, cognitive load, or
permission-based.
2. Simplified 2-step alternative workflow.
3. Contextual help link and inline error message improvements.
4. Micro-recovery email to users who dropped off at this exact step.

Expected Output Format:
Friction audit checklist + optimized copy alternatives.
```

Prompt 50: Interactive Product Demo Script & Tour Guide

```
Role: Interactive Walkthrough Producer
Objective: Script a self-guided interactive product tour using tools like Navattic or
Arcade for {{PRODUCT_NAME}}.

Instructions:
1. 5 sequential interactive checkpoints.
2. Callout cards explaining business context at each click.
3. Simulated result calculation screen.
4. Final CTA card inviting user to deploy on their own data.

Expected Output Format:
Step-by-step interactive script with user click triggers.
```

Prompt 51: Automated NPS / CSAT Micro-Survey & Routing

```
Role: Customer Experience Architect
Objective: Deploy a 1-question in-app CSAT survey and route feedback intelligently.

Instructions:
1. Timing trigger: Triggered immediately after a successful core workflow completion.
2. Rating 9-10 (Promoters): Auto-prompt to leave a G2 review or join referral program.
3. Rating 7-8 (Passives): Inquire what 1 feature would make it a 10.
4. Rating 1-6 (Detractors): Instant internal alert to founder/CSM to resolve issue within
2 hours.

Expected Output Format:
Survey microcopy + conditional routing workflow.
```

Prompt 52: In-App Referral & Invite-a-Teammate Virality Loop

```
Role: Viral Growth Specialist
Objective: Engineer a viral loop incentivizing users to invite colleagues into their workspace.

Instructions:
1. Give-Get Incentive: 'Give your colleague $50 credit, get $50 credit'.
2. Frictionless input: Multiple email input box with Google Contacts / Slack sync.
3. Pre-written invitation email from user to their colleague explaining why they invited them.
4. Team collaboration benefit highlight.

Expected Output Format:
Referral modal copy + viral email invite template.
```

Prompt 53: Workspace Multi-Seat Expansion Prompt

```
Role: Expansion Revenue Specialist
Objective: Prompt team admins when their workspace approaches seat saturation.

Instructions:
1. Trigger: Admin has assigned 4 of 5 available seats.
2. In-app banner: 'Your team is growing fast. Add 5 seats with 1-click pooled billing'.
3. Feature highlight: Centralized permissions, shared templates, audit logs.
4. Add seats button with immediate prorated calculation.

Expected Output Format:
Admin notification banner and email copy.
```

Prompt 54: Freemium Expiration / Trial Ending Urgency Cadence

```
Role: Trial Conversion Strategist
Objective: Execute a 3-day urgency sequence before a 14-day free trial expires.

Instructions:
1. Day 11 (3 Days Left): Summary of accomplishments during trial (Data processed, hours saved).
2. Day 13 (24h Left): Urgency warning regarding data preservation and automation continuity.
3. Day 14 (Trial Expired): Soft grace period extension offer with payment link.
4. Day 16 (Post-Expiry): Win-back discount offer.

Expected Output Format:
4 high-converting trial expiration emails.
```

Prompt 55: Self-Serve Customer Welcome Video Script

```
Role: Founder & Creative Director
Objective: Write a 60-second authentic founder welcome video embedded on the first-login screen.

Instructions:
1. Warm, human welcome thanking them for trusting {{PRODUCT_NAME}}.
2. The 'One Thing': Tell them the single most important action to take right now.
3. Personal commitment to their success: 'Hit reply to any email and it goes straight to my inbox'.
4. Zero corporate jargon.

Expected Output Format:
Founder video script with tone guidance and visual staging notes.
```

Prompt 56: Customer Community Invitation & Orientation Flow

```
Role: Community Director
Objective: Onboard new paid users into an exclusive customer Slack/Discord community.

Instructions:
1. Invitation email framing the community as a private network of elite practitioners.
2. #introductions channel template prompt for new members.
3. Weekly recurring rituals (AMA, Template Share Friday, Office Hours).
4. Community guidelines maintaining high signal-to-noise ratio.

Expected Output Format:
Community welcome sequence + channels architecture.
```

Prompt 57: In-App Release Note & Feature Micro-Feedback Modal

```
Role: Product Feedback Specialist
Objective: Collect immediate user sentiment on newly shipped features inside the product UI.

Instructions:
1. Compact modal anchored to the new button or navigation item.
2. 2-sentence explanation of what changed.
3. Quick thumbs up / thumbs down reaction buttons.
4. Optional 1-sentence comment field for rapid iteration.

Expected Output Format:
Micro-modal UI copy and event payload spec.
```

Prompt 58: Personalized Dashboard Metric Digest Email

```
Role: Customer Analytics Strategist
Objective: Generate weekly automated performance summary emails sent to users every Monday morning.

Instructions:
1. Subject: 'Your {{PRODUCT}} Weekly Digest: {{HOURS_SAVED}} hrs saved'.
2. 3 prominent metric badges (Tasks automated, Pipeline generated, Errors prevented).
3. Trend comparison: '+24% vs last week'.
4. Recommended action: '1 task needs your attention today'.

Expected Output Format:
HTML email wireframe and copy template with dynamic data tags.
```

Prompt 59: Customer Champion Identification & Badge System

```
Role: Customer Advocacy Strategist
Objective: Identify power users who log in daily and award them 'Verified Power Architect' status.

Instructions:
1. In-app badge notification modal.
2. Exclusive perks: Direct roadmap voting rights, private beta access, free swag pack.
3. Request for quote / headshot for customer wall of love.
4. Social shareable badge graphic spec.

Expected Output Format:
Champion recognition modal copy and enablement workflow.
```

Prompt 60: Proactive In-App Support Deflection & Self-Help Article

```
Role: Technical Support Architect
Objective: Create an intelligent self-service knowledge base answer resolving {{TOP_SUPPORT_QUESTION}}.

Instructions:
1. Direct solution in first paragraph with screenshot placeholder.
2. Common troubleshooting steps if error persists.
3. Interactive copyable code block or config snippet.
4. Escalation button to live human chat if unresolved.

Expected Output Format:
Structured Help Center article in Markdown.
```

Module 4: Social Media Authority & Multi-Channel Distribution (Prompts 61–80)

Prompt 61: Viral Technical LinkedIn Post Engine

```
Role: High-Impact B2B Content Creator
Objective: Write an authoritative LinkedIn breakdown explaining how to build
{{TECHNICAL_ARCHITECTURE}} using AI agents.

Instructions:
1. Hook (Lines 1-2): Provocative observation about why 95% of engineering teams build this
incorrectly.
2. Context: The hidden cost of conventional setups (latency, token costs, maintenance).
3. The 4-Step Solution Architecture: Bulleted, clean, technical depth without buzzwords.
4. The Golden Rule: One memorable philosophical takeaway.
5. Call to Conversation: An engaging, open-ended technical question.

Expected Output Format:
Publication-ready LinkedIn post with line breaks and unicode formatting.
```

Prompt 62: Multi-Platform Social Repurposing Engine

```
Role: Content Distribution Director
Objective: Take a single 2,000-word blog post or product release and splinter it into 5
distinct social assets.

Instructions:
1. Asset 1: 10-tweet X (Twitter) Mega-Thread with hook and summary.
2. Asset 2: Authoritative LinkedIn carousel script (8 slides).
3. Asset 3: Short-form video script (TikTok / YouTube Shorts / Reels under 60s).
4. Asset 4: Email newsletter editorial takeaway.
5. Asset 5: Punchy contrarian quote graphic caption.

Expected Output Format:
Full multi-channel package in organized Markdown sections.
```

Prompt 63: Contrarian Industry Take & Poll Strategy

```
Role: B2B Growth Strategist
Objective: Craft a high-engagement LinkedIn Poll and accompanying editorial debating
{{CONTROVERSIAL_TOPIC}}.

Instructions:
1. Hook: State an uncomfortable industry truth.
2. Poll Question: Clear, binary or 4-option question forcing an opinion.
3. 4 Poll Options: Thoughtfully worded representing different operational philosophies.
4. Accompanying post context: State your own stance with empirical justification.
5. Pinned comment to seed debate.

Expected Output Format:
Complete poll specification and commentary copy.
```

Prompt 64: Behind the Build / Transparent Founder Devlog

```
Role: Transparent Startup Founder
Objective: Write a vulnerable, authentic devlog post sharing a technical breakthrough or
setback while building {{FEATURE}}.

Instructions:
1. The Hypothesis: What we thought would take 2 days.
2. The Reality: Why it failed in production on Saturday night.
3. The Pivot: The architectural redesign that solved it.
4. The Metric: Latency dropped from 2.4s to 180ms.
5. Raw screenshot / terminal code block inclusion.

Expected Output Format:
Engaging founder story post formatted for X and LinkedIn.
```

Prompt 65: Visual Framework & Architecture Diagram Explainer

```
Role: Technical Architect & Educator
Objective: Write the accompanying text for a Mermaid architecture diagram showing
{{SYSTEM_WORKFLOW}}.

Instructions:
1. Headline: 'How modern {{CATEGORY}} stacks actually work in 2026'.
2. The 3 layers: Ingestion, Cognitive Processing (LLM), and Action Execution (APIs).
3. The single biggest bottleneck teams overlook (State management).
4. Call to save / bookmark for reference.

Expected Output Format:
Mermaid diagram code block + viral social breakdown caption.
```

Prompt 66: Step-by-Step Tactical Carousel Slide Copy

```
Role: B2B Visual Storyteller
Objective: Write an 8-slide educational carousel teaching 'The 5-Step Agentic Workflow for B2B Founders'.

Instructions:
1. Slide 1 (Cover): Bold title, compelling subtitle, author handle.
2. Slides 2-6: 1 tactical step per slide (Headline, 2 bullet points, 1 pro-tip).
3. Slide 7: Summary scorecard / checklist.
4. Slide 8: CTA to download the full master prompt library.

Expected Output Format:
Slide-by-slide copy with visual design cues for graphic designer.
```

Prompt 67: Weekly Newsletter Deep Dive & Editorial Synthesis

```
Role: Chief Newsletter Editor
Objective: Write a 1,200-word issue of 'The Autonomous Revenue Leader' on {{WEEKLY_THEME}}.

Instructions:
1. The Big Idea: Why this week's theme matters right now.
2. The Deep Dive: 3 concrete frameworks with diagrams and real company examples.
3. Tool of the Week: Unbiased teardown of a high-leverage agentic tool.
4. Prompt of the Week: Ready-to-copy prompt with sample output.
5. Parting Thought: 1 philosophical quote on leverage.

Expected Output Format:
Complete Substack / Beehiiv newsletter issue in Markdown.
```

Prompt 68: High-Engagement X (Twitter) Mega-Thread Architect

```
Role: X Growth Engineer
Objective: Draft a 12-tweet viral thread breaking down '10 AI Automations That Save 20+ Hours Every Week'.

Instructions:
1. Tweet 1 (Hook): Compelling statement + social proof + 'Here is the exact blueprint:'
2. Tweets 2-11: 1 specific automation per tweet (Tool, Workflow, Result, Copyable prompt).
3. Tweet 12 (Conclusion): Summary table + RT request + link to full landing page.

Expected Output Format:
Numbered thread tweets with character counts under 270 per tweet.
```

Prompt 69: How We Scaled Retrospective Teardown

```
Role: VP of Growth
Objective: Write a case-study style post detailing 'How we went from $0 to $100k ARR in 90 days with 0 sales reps'.

Instructions:
1. The Initial Bottleneck: Why hiring SDRs wasn't viable.
2. The Autonomous Engine: The 3 automated systems built instead.
3. The Exact Numbers: Conversion rates, churn, gross margins.
4. The 3 Mistakes: What we would do differently today.
5. Link in comments to the playbook.

Expected Output Format:
Detailed, metrics-heavy social essay.
```

Prompt 70: Technical Tool Comparison & Vendor Audit Post

```
Role: Independent Technology Auditor
Objective: Compare 3 leading solutions in {{CATEGORY}} objectively for engineering leaders.

Instructions:
1. Criteria: Latency, Developer DX, Pricing transparency, Enterprise security.
2. Vendor A: Best for enterprise with large legacy compliance needs.
3. Vendor B: Best for early-stage hackers.
4. Vendor C (Your Product): Best for autonomous agentic scale.
5. Neutral closing inviting engineers to share their benchmarks.

Expected Output Format:
Clean comparison post with formatting for high readability.
```

Prompt 71: The 'Mistake / What Went Wrong' Post-Mortem Hook

```
Role: Authentic Growth Practitioner
Objective: Share a $10,000 marketing or technical mistake and the exact SOP built to prevent it forever.

Instructions:
1. Hook: 'We burned $12,400 on {{EXPERIMENT}} last month. Here is the post-mortem:'
2. What the data predicted vs what happened in production.
3. The root cause analysis (Cognitive bias / false assumptions).
4. The new automated guardrail implemented.
5. Lesson for other founders.

Expected Output Format:
High-engagement vulnerability post designed to build authority and trust.
```

Prompt 72: High-Intent Comment-to-DM Lead Magnet Offer

```
Role: Lead Generation Inbound Architect
Objective: Draft a 'Comment {{KEYWORD}} and I will DM you the template' viral post.

Instructions:
1. Tease a high-value proprietary asset (e.g. 'Our internal 40-page prompt database').
2. Show a screenshot or preview GIF of the asset in action.
3. Give away 3 tips directly in the post so it delivers standalone value.
4. Call to Action: 'Comment AGENT below and my automated bot will DM you the direct PDF link'.

Expected Output Format:
Viral giveaway post copy + automated DM message template.
```

Prompt 73: Customer Win & ROI Showcase Micro-Case Study

```
Role: Customer Advocacy Strategist
Objective: Highlight a customer's success in a punchy, narrative social post without feeling like a sales pitch.

Instructions:
1. Hook: 'Client X just hit {{MAJOR_MILESTONE}} in 28 days. Here is their exact stack:'
2. Before state: 14 hours/week lost to manual work.
3. The 1 tweak: Deploying autonomous prompt architecture.
4. After state: 3.4x output, team morale up.
5. Congratulate the customer team publicly.

Expected Output Format:
Celebratory case study post with tag placeholders.
```

Prompt 74: Industry Myth-Buster & First-Principles Debunking

```
Role: Contrarian Thought Leader
Objective: Debunk 3 widespread myths in {{INDUSTRY_SECTOR}} with empirical math.

Instructions:
1. Myth 1: 'You need 10 SDRs to scale outbound'. Debunk with agentic math.
2. Myth 2: 'AI content kills SEO rankings'. Debunk with technical intent topology.
3. Myth 3: 'Enterprise clients won't buy from small teams'. Debunk with security automation.
4. Conclusion: The modern small team has the leverage of a 500-person corporation.

Expected Output Format:
Myth-busting post with bold headers and clear formatting.
```

Prompt 75: Live Q&A / AMA Announcement & Framing Strategy

```
Role: Event Host & Community Builder
Objective: Promote an upcoming live technical AMA: 'Building Autonomous Revenue Engines
with Python & AI'.

Instructions:
1. Announce date, time, and streaming platform.
2. List 3 specific technical architectures that will be live-coded.
3. Promise: 'No sales pitch. Pure terminal commands, code walkthroughs, and Q&A'.
4. Ask followers to drop their toughest questions in the comments.

Expected Output Format:
Event announcement post with RSVP call to action.
```

Prompt 76: Trending Tech News & Paradigm Shift Commentary

```
Role: Tech Trends Analyst
Objective: React to a major industry announcement (e.g. new frontier model release, API
update) within 2 hours.

Instructions:
1. The News: 1-sentence breakdown of what actually changed.
2. The Noise vs The Signal: Why 90% of reactions miss the true impact.
3. The 3 Second-Order Effects: How this changes B2B economics over the next 12 months.
4. Tactical takeaway: What founders should do by Friday.

Expected Output Format:
Rapid-response thought leadership commentary.
```

Prompt 77: Multi-Speaker Podcast / Interview Soundbite Clipper

```
Role: Multimedia Content Producer
Objective: Extract the most controversial 60-second snippet from an interview with
{{GUEST_NAME}} and write the social post.

Instructions:
1. Hook: Direct provocative quote in quotation marks.
2. Background: Why {{GUEST_NAME}}'s perspective is uniquely qualified.
3. The Core Argument summarized in 3 sentences.
4. Link to full episode on Spotify / Apple Podcasts.

Expected Output Format:
Podcast clip caption with timestamp reference and quote cards.
```

Prompt 78: Employee Advocacy & Team Amplification Templates

```
Role: Internal Communications Director
Objective: Create 3 distinct post variations for internal team members to share company
announcements authentically.

Instructions:
1. Engineering Perspective: Focus on the technical hurdles overcome.
2. Customer Success Perspective: Focus on the customer problems solved.
3. Sales Perspective: Focus on market demand and speed.
4. Freedom to customize instructions.

Expected Output Format:
3 employee post variations with guidance notes.
```

Prompt 79: Weekly High-Value Curated Resource Roundup

```
Role: Curator & Community Lead
Objective: Curate the top 5 papers, tools, and prompts of the week in {{NICHE}}.

Instructions:
1. Title: 'The Autonomous Growth Stack: Issue #{{NUMBER}}'.
2. 5 curated items: 1-sentence summary + why it matters + direct link.
3. 1 bonus community question.
4. CTA to subscribe to the newsletter for future digests.

Expected Output Format:
Roundup post formatted for clean skim-reading.
```

Prompt 80: Social Call-to-Conversation & Debate Catalysts

```
Role: Community Engagement Engineer
Objective: Craft a single provocative question designed to generate 100+ executive
comments.

Instructions:
1. Question framing: 'B2B Founders: Would you rather have 10,000 newsletter subscribers or
50 qualified enterprise demo requests? Why?'
2. 2-sentence rationale showing both sides of the tradeoff.
3. First comment seed from author.

Expected Output Format:
Short-form conversation catalyst post.
```

Module 5: Retention, Churn Prevention & Account

Expansion (Prompts 81–100)

Prompt 81: Predictive Churn Intervention System

```
Role: Head of Customer Success
Objective: Triage and intervene when an enterprise account exhibits a 45% telemetry drop
over 14 days.

Instructions:
1. Automated internal alert with account historical spend and champion info.
2. Direct, empathetic email from founder/VP to executive sponsor.
3. Concrete offer: Free engineering audit / custom configuration call.
4. Follow-up task assigned to CSM with 24h deadline.

Expected Output Format:
Intervention email template + CSM triage checklist.
```

Prompt 82: Quarterly Business Review (QBR) Executive Presentation

```
Role: Strategic Customer Success Director
Objective: Build a 10-slide high-impact QBR deck proving quantifiable value for
{{CLIENT_NAME}}.

Instructions:
1. Slide 1: Partnership Mission & Executive Goals Alignment.
2. Slides 2-4: Quantified Business Value (Hours saved, Tasks executed, ROI multiplier).
3. Slides 5-7: Team Adoption Metrics & Top Power Users.
4. Slides 8-9: Strategic Roadmap for Upcoming Quarter.
5. Slide 10: Contract Expansion / Multi-Year Renewal Proposal.

Expected Output Format:
Slide-by-slide executive talking points with data chart mockups.
```

Prompt 83: Cross-Department SaaS Upsell & Expansion Proposal

```
Role: Account Growth & Expansion Director
Objective: Expand an existing paid customer from Marketing department into Sales &
Engineering.

Instructions:
1. Acknowledge existing success in Marketing: 'Your marketing team automated 1,400 tasks
this quarter'.
2. Identify cross-department synergy: How Sales can utilize the exact same data without
duplicating subscriptions.
3. Unified enterprise workspace pricing proposal with volume seat discount.
4. 30-day proof-of-concept for the new department at no extra cost.

Expected Output Format:
Expansion proposal letter + executive ROI comparison.
```

Prompt 84: Executive Sponsor Departure & New Champion Transition

```
Role: Client Retention Specialist
Objective: Navigate the departure of your primary buyer champion at
{{ENTERPRISE_ACCOUNT}}.

Instructions:
1. Reach out to departing champion: Congratulate, secure personal contact info, and ask
for introduction to interim successor.
2. Outreach to new incoming executive: Present 1-page summary of accomplishments achieved
to date.
3. Offer a 20-minute executive briefing to align with their new strategic vision.
4. Avoid sales pressure; establish immediate continuity and reliability.

Expected Output Format:
2 transition email templates (Departing Champion & Incoming Executive).
```

Prompt 85: Price Increase Notice & Grandfathering Retention Letter

```
Role: Chief Commercial Officer
Objective: Announce a 20% platform price increase while locking in current customers for multi-year renewals.

Instructions:
1. Explain the investments made into platform capabilities, infrastructure speed, and new AI models.
2. State the new standard pricing taking effect next month for new customers.
3. Offer existing customers the exclusive right to lock in their existing lower rate for 24 months by renewing early.
4. Transparent, confident, and customer-centric tone.

Expected Output Format:
Customer price update notice + early renewal incentive agreement.
```

Prompt 86: Customer Health Scorecard & Account Review Matrix

```
Role: VP of Customer Experience
Objective: Construct a predictive 5-pillar Customer Health Score algorithm for {{PRODUCT_NAME}}.

Instructions:
1. Pillar 1: Product Usage Frequency (Daily/Weekly Active Users).
2. Pillar 2: Core Feature Depth (Number of advanced prompts/workflows triggered).
3. Pillar 3: Support Ticket Velocity & Sentiment.
4. Pillar 4: Invoice Status & Billing Health.
5. Pillar 5: Executive Relationship & QBR Engagement.
6. Assign weights (Total 100%) and define Green/Yellow/Red action triggers.

Expected Output Format:
Health score formula table + automated intervention playbook per tier.
```

Prompt 87: Root-Cause Post-Mortem for Lost Enterprise Accounts

```
Role: Customer Operations Analyst
Objective: Conduct an objective exit interview and internal post-mortem for churned
account {{ACCOUNT_NAME}}.

Instructions:
1. Exit interview invitation email asking for 10 minutes of unfiltered feedback.
2. 4 diagnostic exit questions isolating product gaps, pricing friction, or internal re-
orgs.
3. Internal post-mortem document summarizing what product/sales could have done
differently.
4. Tagging root cause in CRM (Feature gap, Budget, Champion left, Poor onboarding).

Expected Output Format:
Exit survey email + internal root-cause post-mortem template.
```

Prompt 88: Customer Advisory Board (CAB) Invitation & Agenda

```
Role: CEO & Head of Product
Objective: Invite the top 15 most strategic customers to an exclusive Customer Advisory
Board.

Instructions:
1. Invitation letter framing membership as a prestigious, invitation-only council.
2. CAB Charter: 2 virtual meetings per year + 1 annual executive dinner.
3. Perks: Direct influence on product roadmap, early access to unreleased models, peer
networking.
4. Agenda outline for the inaugural 90-minute session.

Expected Output Format:
CAB invitation letter + 90-minute meeting agenda.
```

Prompt 89: Co-Marketing & Case Study Collaboration Pitch

```
Role: Customer Advocacy Lead
Objective: Invite a happy customer who achieved stellar metrics to co-produce a case study
and PR release.

Instructions:
1. Compliment their team's execution and quantified results.
2. Explain the exposure: Featured on our homepage, distributed to 50k+ newsletter
subscribers, submitted to industry press.
3. Zero-effort guarantee: 'Our writer handles 100% of the draft; you just review for 10
minutes'.
4. Bonus: Complimentary upgrade / tier extension.

Expected Output Format:
Co-marketing pitch email with approval workflow.
```

Prompt 90: Annual Contract Renewal Early-Bird Discount Offer

```
Role: Revenue Retention Specialist
Objective: Convert monthly recurring billing accounts into prepaid annual agreements.

Instructions:
1. Send 60 days before contract anniversary.
2. Financial incentive: 2 months completely free + free premium onboarding.
3. Accounting benefit: Single annual invoice, predictable budgeting, locked-in price.
4. 1-click upgrade link via customer portal.

Expected Output Format:
Annual contract conversion email cadence.
```

Prompt 91: High-Value Feature Request Priority Notification

```
Role: Product Communications Specialist
Objective: Notify a customer who previously requested a feature that it is now deployed
live to production.

Instructions:
1. Personalized reference: 'You asked for {{FEATURE_NAME}} on our call 3 months ago. Today
it's live'.
2. 30-second screen recording GIF showing how to use it.
3. Thank them for helping shape the platform.
4. Ask for their immediate feedback after trying it out.

Expected Output Format:
High-delight feature release notification email.
```

Prompt 92: SLA Breach Apology & Customer Recovery Plan

```
Role: VP of Engineering & VP of Customer Success
Objective: Address a major platform downtime incident or API SLA breach transparently.

Instructions:
1. Direct executive apology without defensive excuses.
2. Root Cause Analysis (RCA): Plain-English technical explanation of what failed.
3. Permanent Remediation: 3 infrastructure safeguards deployed to ensure it never happens
again.
4. Commercial Remedy: Automatic service credit applied to their next invoice without
asking.

Expected Output Format:
Executive SLA incident notification letter.
```

Prompt 93: Executive Sponsor Check-in from Founder / CEO

```
Role: Founder & CEO
Objective: Send a periodic, high-touch 4-sentence email from the founder to enterprise
customer executives.

Instructions:
1. Personal note: No sales pitch, no survey links.
2. Check-in question: 'Are we delivering on the business outcomes your team signed up
for?'
3. Invitation for raw feedback: 'If anything is sluggish or falling short, let me know
directly'.
4. Reaffirmation of long-term partnership commitment.

Expected Output Format:
Authentic CEO check-in email template.
```

Prompt 94: Under-Utilized Seat Cleanup & Team Re-Engagement

```
Role: Customer Success Manager
Objective: Help an enterprise admin reallocate inactive seats before they ask for a
contract reduction.

Instructions:
1. Proactive alert: 'Notice 4 teammates haven't logged in over 30 days'.
2. Offer 1: Free 15-minute re-training workshop for those teammates.
3. Offer 2: Reassign seats to their new department initiative.
4. Shows customer-first integrity rather than hoarding unused seats.

Expected Output Format:
Proactive seat audit and training offer email.
```

Prompt 95: Product Sunset / Deprecation Migration Guide

```
Role: Director of Product Operations
Objective: Communicate the sunsetting of legacy feature {{FEATURE}} and guide users to the
modern alternative.

Instructions:
1. Timeline: 90-day deprecation notice with milestone dates.
2. Why it matters: The superior performance and security of the new agentic architecture.
3. Migration guide: 3 steps to transition data with automated migration script.
4. Dedicated office hours link for engineering teams needing help.

Expected Output Format:
Feature deprecation notice and migration checklist.
```

Prompt 96: Enterprise Security & Compliance Assurance Dossier

```
Role: Chief Information Security Officer (CISO)
Objective: Equip enterprise buyers with a complete compliance packet resolving security
review delays.

Instructions:
1. SOC 2 Type II, GDPR, and HIPAA compliance summaries.
2. Data encryption standards (AES-256 at rest, TLS 1.3 in transit).
3. AI Model Data Privacy Guarantee: 'Zero customer data is ever retained or used to train
public models'.
4. Disaster recovery and penetration test executive summary.

Expected Output Format:
1-page CISO security assurance brief.
```

Prompt 97: Customer Training & Certification Curriculum Architect

```
Role: Head of Customer Enablement
Objective: Design a 4-module 'Certified Autonomous Operator' program for client employees.

Instructions:
1. Module 1: Prompt Architecture & Schema Discipline.
2. Module 2: Connecting External APIs & Data Pipelines.
3. Module 3: Error Handling, Guardrails & Human-in-the-Loop Review.
4. Module 4: Measuring & Reporting ROI to Leadership.
5. Practical exam project + LinkedIn certification credential.

Expected Output Format:
Customer certification curriculum syllabus.
```

Prompt 98: Account Escalation Resolution & Trust Restoration Plan

```
Role: Chief Customer Officer
Objective: De-escalate an account where an executive threatened cancellation due to poor
experience.

Instructions:
1. 1-hour internal discovery to gather all facts before calling client.
2. Personal call outline: Listen first, acknowledge frustration without defensiveness.
3. Action plan: Dedicated senior engineer assigned to their ticket queue for 30 days.
4. Weekly status update email cadence until trust is completely restored.

Expected Output Format:
De-escalation protocol and executive follow-up email.
```

Prompt 99: Expansion Opportunity Trigger (API Limit / Storage Warning)

```
Role: Growth Engineering Lead
Objective: Send a high-conversion automated warning when a team hits 90% of their monthly
throughput quota.

Instructions:
1. Notification: 'Your automated pipelines processed 90,000 of your 100,000 monthly
operations'.
2. Reassurance: Pipelines will not halt abruptly.
3. 1-click upgrade button to the Unlimited Enterprise tier with volume pricing.
4. Contact rep button for custom invoicing.

Expected Output Format:
Quota alert banner copy and email alert template.
```

Prompt 100: Customer Advocacy & Reference Program Invitation

```
Role: Head of Advocacy Marketing
Objective: Enroll happy customers into an executive peer-reference network with tangible
rewards.

Instructions:
1. Selective invitation: 'Inviting you to our exclusive Founders Circle'.
2. Commitment: Agree to take max one 15-minute call per quarter with a prospective
enterprise buyer.
3. Rewards: $500 software credit per call + VIP dinner invitation at annual summit.
4. 1-click acceptance form.

Expected Output Format:
Advocacy program invitation email and agreement terms.
```

Standard Operating Procedures (SOP 1–4)

SOP 1: The Autonomous Weekly B2B Content Engine

Execution Cadence: 45 mins/week
Quantified Business Impact: 1 High-Intent Pillar + 5 Social Posts + 1 Newsletter on autopilot

Step-by-Step Procedure:

1. Input: Select 1 high-intent topic from Module 1 (e.g. Prompt #1).
2. Generation: Run Prompt #2 to create the 1,800-word authoritative pillar essay.
3. Multi-Channel Splintering: Feed the pillar into Prompt #62 (Repurposing Engine) to generate 1 X thread, 5 LinkedIn posts, and 1 newsletter issue.
4. Automated Distribution: Populate the generated posts into `promotional_tips.csv` and run `auto_poster.py`.

5. Conversion Tracking: Measure inbound traffic and Gumroad sales attribution weekly.

SOP 2: Real-Time Competitor Intelligence & Counter-Positioning

Execution Cadence: 48-hr turnaround
Quantified Business Impact: Zero lost deals to competitor positioning blindsides

Step-by-Step Procedure:

1. Monitoring: Set automated scrapers or alerts for competitor pricing, feature announcements, and G2 reviews.
2. Analysis: Run Prompt #4 (Battlecard Generator) to extract weaknesses and strategic divergence.
3. Sales Enablement: Distribute the 1-page battlecard to the sales team within 24 hours.
4. Public BOFU Asset: Run Prompt #6 to publish an objective 'Top Alternatives' page capturing search intent.
5. Feedback Loop: Update positioning monthly based on win/loss interview telemetry.

SOP 3: Cold Outbound Dynamic ICP Scoring & Personalization

Execution Cadence: 100% Automated
Quantified Business Impact: 18.4% Average Reply Rate across target accounts

Step-by-Step Procedure:

1. Signal Ingestion: Ingest verified trigger events (hiring, funding, tech migrations) via data enrichment APIs.
2. Prompt Formatting: Run Prompt #21 with dynamic company and prospect variables.
3. Guardrail Review: Automatic check for word count (<85 words) and negative constraints (zero buzzwords).
4. Omnichannel Cadence: Run Prompt #23 to sequence email, LinkedIn touchpoints, and soft-offer follow-ups.
5. Conversion Handoff: Route positive replies directly to calendar scheduler.

SOP 4: Churn Risk Flagging & Automated Interventions

Execution Cadence: Real-time Telemetry
Quantified Business Impact: 35% Voluntary Churn Reduction

Step-by-Step Procedure:

1. Event Ingestion: User telemetry continuously monitored for 40%+ drop in 14-day login frequency.
2. Triage & Flagging: Run Prompt #86 (Health Scorecard) to categorize account risk tier.
3. Automated Interventions: Trigger Prompt #81 (Predictive Churn Intervention) from founder/VP account.

4. CSM Routing: Generate automated high-priority ticket with account context and suggested remediation.
5. Root-Cause Logging: If account cancels, execute Prompt #87 post-mortem to patch product friction.

Production Automation Architecture & Tooling Stack

To scale beyond manual prompt copying, connect your prompts to automated infrastructure using the following stack:

1. **Data Ingestion:** Clearbit, Apollo, or Crustdata for real-time B2B buyer intent triggers.
2. **Workflow Orchestration:** Python scripts (`auto_poster.py`), n8n, or Make.com.
3. **Unified Distribution:** Zernio Marketing API (`zernio-sdk`) for automated multi-channel posting across LinkedIn, X, and Facebook.
4. **Conversion Engine:** Next.js Landing Page with embedded Gumroad / Lemon Squeezy checkout.
